

TURNING GOALS INTO ACTIONS

Research and Innovation
for climate change mitigation

14.06.2024

Duomo di San Cataldo
Piazza Duomo, Taranto

BRIEF

Climate change is a challenge that demands an immediate and concerted global response. The Municipality of Taranto, in collaboration with the Italian Chamber of Commerce in Canada, Ministry of Enterprises and Made in Italy, and CTE Taranto, a Consortium focused on One Health led by the Municipality of Taranto and funded by the Ministry of Enterprises and Made in Italy and the Fund for Development and Cohesion, are pleased to present an extraordinary event dedicated to translating climate goals into concrete and tangible actions.

"Turning Goals into Actions" brings together an exceptional lineup of speakers from the international scientific, academic, and business communities. These experts will share their insights, cutting-edge research, and practical solutions for addressing the climate crisis effectively and efficiently.

Through panel discussions, interactive workshops, and networking sessions, the experts will explore best practices, emerging technologies, and the necessary policies to drive meaningful transformation towards a low environmental impact economy. The crucial role of innovation in promoting sustainable and resilient solutions for our planet will be highlighted.

At a time when the urgency of climate action has never been clearer, this event will offer a unique opportunity to catalyze change, accelerate collaboration between countries and international working groups to foster progress towards a greener and fairer future for all.
